

With New Taipei City, Taiwan, as the landscape, we welcomed the 2nd edition of the **Educational Technologies (ICEduTech) International Conference** (during 10-12 December, 2014).

This conference was organized by the International Association for Development of the Information Society (IADIS) and co-organized by the Tamkang University, New Taipei City, Taiwan. This was also co-sponsored by Curtin University, Curtin Business School, Australia, and ISPIM - International Society for Professional Innovation Management.

Once again, this event tried to address the real topics as seen by teachers, students, parents and school leaders. Scientists, professionals and institutional leaders were invited to be informed by experts, sharpen the understanding what education needs and how to achieve it. The broad areas of interest were: Education in Context, Education as Professional Field, Curricular Evolution, Learner Orientation, Integrating Educational Technologies and International Higher Education.

This edition was published jointly with the international conference on International Conference on Sustainability, Technology and Education (STE 2014). These events received 112 submissions from more than 23 countries. Each submission was reviewed in a double-blind review process by an average of four independent reviewers to guarantee quality and maintain high standards. Out of the papers submitted, 22 got blind evaluations ratings that published them as full papers, which meant that the acceptance rate was 20%. Some other submissions were published as short papers and reflection papers

Extended versions of the best papers were selected to be published
